

ISO 13381-1:2004 provides guidance for the development of prognosis processes. It is intended to allow the users and manufacturers of condition monitoring and diagnostics systems to share common concepts in the fields of machinery fault prognosis; to enable users to determine the necessary data, characteristics and behaviour necessary for accurate prognosis; to outline an appropriate approach to prognosis development; and to introduce prognoses concepts in order to facilitate the development of future systems and training.

The Cruise Of The Antarctic To The South Polar Regions, Theories and Strategies of Family Therapy, Change Your Life In Ten Weeks: The Phoenix Self-Help Life Plan, How Big is Big and How Small is Small: The Sizes of Everything and Why, Quick & Easy: Green Salads and Dressings (Salads and Dressings Recipes Cookbook Book 1),
